

# BLACK LEAF

## *St Julian's Advertising Walls* *Prices*

# Objective

The goal of this project is to transform the perimeter of the St. Julians construction site — spanning Triq Santu Wistin, Triq is-Swieqi, and Triq Elija Zammit — into a **premium outdoor advertising circuit**.

The installation will feature **five distinct advertising walls**, designed to enhance the site's visual appeal while **generating steady, long-term revenue** through strategic ad placements.

Each wall has been creatively branded to form a cohesive and **marketable advertising network**, totaling approximately 200 metres of advertising space.
